

Latest news from DIADEM

Slides for SATURN User Group Meeting 2007

Headlines

- Major new release before end of 2007
- Significant new features

New features #1

- PA/tour-based demand modelling
 - As presented at last year's SATURN UGM
 - For technical details see forthcoming ETC paper 'Modelling time period choice in large-scale hierarchical demand models: some problems and a solution'
- Absolute demand modelling
- Spatial segmentation
 - Distribution lambda parameters can vary by zone pair

New features #2

- Intra-zonal costs
 - DIADEM will estimate intra-zonal costs
 - Will allow redistribution between inter and intra-zonal trips
- Re-engineered user interface and control file format
 - More robust
 - Appearance remains essentially the same
 - Full backwards compatibility with old control files

Keep in touch

- Comments, suggestions, feature requests etc. always welcome
- Training: let us know if you're interested in attending a course and your preferred location
